

TrustSafe® Auth

Multi-factors Authentication Solution

Add an extra layer of protection on user verification

Effective way to control password vulnerability

FAST

Support RADIUS, LDAP, OAuth 2.0 integration standard

Provide Java API for easy integration

Support both on premises and SaaS cloud deployment

SECURE

Enterprises can mix & match a right combination of authentication methods to access various applications based on assurance level and security policies

EASY

Designed with multiple hierarchy administration and end-user self-service portal for delegation

Provide mobile app to support software OTP, mobile push and QR code authentication methods

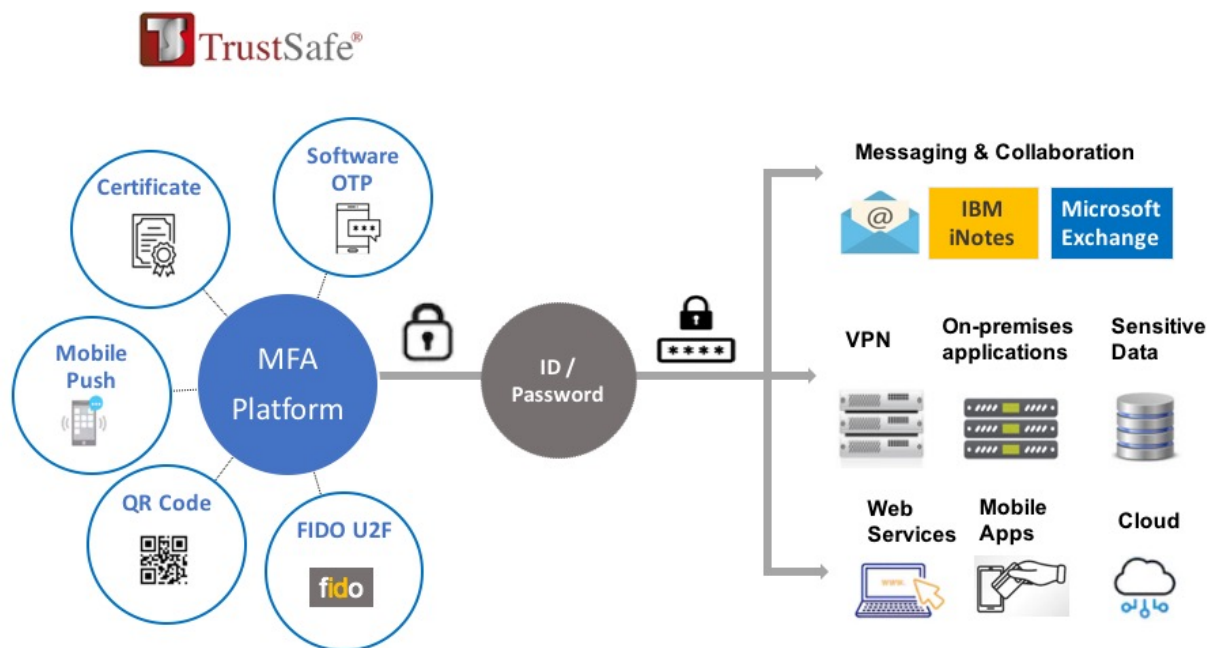

Security doesn't always mean complicated
We offer simpler MFA solution for fast deployment

Open Standard for Integration

TrustSafe Auth is a robust and scalable solution for enterprises of all sizes including SMEs as well as independent software developers.

It supports RADIUS, LDAP and OAuth to integrate various applications, including messaging and collaboration system, on-premise applications as well as web services.

Independent software developers can expand 2FA or MFA on their existing applications such as CRM and HR systems to address more stringent privacy concerns from their end users.

Mix & Match MFA

Enterprises can enable authorization deployment by multi-factors authentication associated with required assurance levels.

TrustSafe Auth is designed with a policy engine to enforce multiple authentication sequence by matching users' roles, systems and authentication methods.

 e-mail + E-mail OTP	 VPN + Mobile push by supervisor	 e-commerce + Mobile push by user
 Password Reset + E-mail OTP	 Public Announcement + Mobile push by supervisor	 Privacy + Mobile push by user
 Super Admin Account + Software OTP + Mobile push by supervisor	 Top Trade Secrets + Software OTP by user + Mobile push by supervisor	 Large Payment + e-sign with cert (Prove Non Repudiation)

Trusted System Ltd is specialized in Messaging & Collaboration Enhancement Solutions. We develop various products under TrustSafe brand with an aim to provide innovative, valued added and cross platform solutions to meet our customers' extra needs. Our products include PKI based Confidential Mail System, Email Compliance Manager, Multi-Factor Authentication, Domino Migration Tool and SharePoint Integrator.
